## PROFESSIONAL SUMMARY

Full Stack Software Engineer with **2.5+ years of experience** designing and building **scalable web applications, developer platforms, and workflow systems** using **TypeScript, React, and Node.js**. Experienced in developing **RESTful APIs, real-time systems, schema-driven architectures, and multi-tenant SaaS platforms**. Proven ability to build complex UI systems, backend services, and data-driven applications with a focus on **performance, maintainability, and scalable system design**.

## TECHNICAL SKILLS

**Programming Languages:** JavaScript (ES6+), TypeScript  
**Frontend:** React.js, Next.js, Svelte, React Flow, TanStack Start, Vite  
**Backend:** Node.js, NestJS, REST APIs, Hono, Drizzle, ElysiaJS  
**Databases:** PostgreSQL  
**Caching:** Redis, LRU Cache  
**Real-Time Communication:** Socket.IO  
**Authentication & Security:** JWT, RBAC, BetterAuth  
**Architecture & Tools:** Multi-tenant SaaS, Monorepo (TurboRepo), Git

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                     |
