PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience building scalable full-stack applications using **React, TypeScript, and NestJS**, specializing in **multi-tenant systems**, complex UI editors, and workflow platforms with concurrency control.

EDUCATION

Francis Xavier's Engineering College

Master of Computer Applications

Tirunelveli, TN, IN

Oct. 2021 – Jun 2023

St.John's College

Bachelor of Computer Applications

Tirunelveli, TN, IN

Jun. 2018 – Apr 2021

EXPERIENCE

Software Engineer

Torus Innovations

Oct 2023 – Present

Tirunelveli, TN, IN

- Built a **node-based visual workflow editor** using **React, TypeScript, and React Flow**, supporting nested sub-flows and dynamic connections.
- Developed **WYSIWYG and JSON schema editors** with reusable React components, reducing manual UI configuration and user input errors.
- Implemented **artifact locking using Socket.IO** to prevent concurrent edits and ensure consistent front-end state management.
- Implemented **OpenAPI-based JSON mapping** for data transformation and manipulation.
- Contributed to a **multi-tenant architecture with RBAC**, ensuring secure and isolated user experiences across tenants.
- Built a **dynamic JSON schema editor** supporting **dropdowns, file uploads, and custom components**, improving configuration accuracy and reducing user input errors.
- Designed and implemented **supporting APIs (NestJS)** to power front-end validation, workflow normalization, and data exchange.
- Contributed to an **in-platform API testing tool** for seamless API validation, reducing reliance on external tools.

PROJECTS

Torus | *React, Vite, Next.js, Nest.js, Redis, MongoDB*

Oct 2023 – Present

- Developed a **low-code workflow automation platform** with a visual editor and real-time collaboration.
- Built **scalable frontend interfaces** and **supporting APIs** for workflow design, validation, and management.

Veza.db | *React, TanStack Start, AI SDK, Hono, PostgreSQL, Drizzle, TurboRepo*

Aug 2025 – Present

- Designed and implemented a **monorepo architecture using TurboRepo**, with shared packages for database handling, authentication, and **LRU caching**.
- Developed the **full frontend** including **ER diagram visualization** using **React Flow**, **table column editor**, and **table data editor**.
- Implemented **user authentication and management** using **BetterAuth**, ensuring secure multi-user access.
- Optimized code organization for **scalability and re-usability**, enabling seamless addition of new database types and editor features.
- Built an **AI-powered, database-agnostic chat assistant** using an **AI SDK** that understands the current **database context (SQL and NoSQL)**, including schemas and collections, and generates **context-aware queries** for users.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML/CSS

Frameworks & Libraries: React, Svelte, React Flow, TanStack Start, Nest.js, Socket.IO, AI SDK, Vite

Databases & Caching: Redis, LRU Cache

Authentication & Security: BetterAuth, JWT

Developer Tools & DevOps: Git, TurboRepo, VS Code
